

Serenity Animal Hospital

13800 15 Mile Rd

Sterling Heights, MI 48312

(586) 264-VETS (8387)

Every surgery or anesthetic experience carries with it an inherent risk. We here at Serenity Animal Hospital pride ourselves in the fact that we minimize this risk with our expert care, use of the safest anesthetics, up to date and properly inspected equipment, and cardiac monitoring of all anesthetized patients. However, we do realize that in some cases this may not be enough to properly assure that your pet will not still be at risk. Therefore, we strongly recommend the following tests, which will further decrease your pet's risk while under anesthesia. PLEASE INITIAL YOUR CHOICES. Thank You!

**Recommended Testing**

- ❖ Pre-Operative Panel 6 Chemistries, Complete Blood Count

This test helps to detect kidney disease, liver disease and diabetes.

\_\_\_ \$65.00 (code PANSP)

\_\_\_ OWNER DECLINES

- ❖ Pre-Operative Panel 12 Chemistries, Complete Blood Count, and Urinalysis

This test helps to detect kidney disease, liver disease and diabetes as well as looking at the function of other internal organs

\_\_\_ \$90.00 (Code GPUA)

\_\_\_ OWNER DECLINES

**Required Testing**

- ❖ Pets ages 7 –UP are required to have a Total Health Panel 12 Chemistries, Complete Blood Count, Electrolytes, Thyroid Check and a Urinalysis ran prior to surgery.

This test helps to detect kidney disease, liver disease and diabetes as well as looking at the function of other internal organs. It will also give us Thyroid function and a look at the body's electrolyte levels.

\_\_\_ \$120.00 (code TPUA)

\_\_\_ OWNER DECLINES

**The following are recommended for the health and safety of your loved one.**

- ❖ IV Fluids: Used during and after the procedure to help flush the liver and kidneys of the medications we use. It is also a great source for what we call an open lifeline is anything goes wrong during the procedure we have immediate access to a vein, so we can administer emergency drugs.

\_\_\_ \$55.00 this is **strongly recommended!**

\_\_\_ OWNER DECLINES

- ❖ Sevoflurane: This is the newest gas anesthesia that can be used during the procedure and was designed to minimize the anesthetic risk for patients

\_\_\_ \$15.00 additional per half hour

\_\_\_ OWNER DECLINES

- ❖ Pre Surgical Electrocardiogram :Detects abnormal heart rhythms, potentially preventing serious heart problems or even death while under anesthesia.

\_\_\_ \$40.00

\_\_\_ OWNER DECLINES

- ❖ Pre Surgical Chest X-rays: We can take an internal look at the chest and lung fields

\_\_\_ \$100.00

\_\_\_ OWNER DECLINES

- ❖ Microchip : This will help to identify your pet if lost or stolen. This is highly recommended and all pets should have one of the forms of identification.

\_\_\_ \$50.00 Microchip
